Rafael Hernandes Jovaneli

Senior Java Developer — Modern Architectures Specialist

Contact

Phone: +55 (11) 99390-3697
E-mail: rafajovaneli@gmail.com
Location: Osasco, São Paulo -Brasil

Professional Summary

Senior Java Developer with over 6 years of experience in corporate systems, specializing in modern architectures, cloud integrations, and agile methodologies. A proactive, organized professional with excellent communication skills and proven technical leadership and teamwork abilities. Fluent in English, with basic knowledge of Spanish and French.

Professional Experience

Developer | SINQIA - Client: SOMPO Seguros (December 2023 – Present)

- JAVA – SOMPO Project: Implementing enhancements in the quotation and endorsement system.
- Development and improvements focused on the automotive insurance environment.
- Use of code repositories (Bitbucket and SVN, Jenkins).
- Utilization of code-reviewers (Sonar).
- Experience with Java application servers: Tomcat, JBoss, and Websphere.
- Architectural experience in Web solutions.
- Development experience in Web projects.
- Experience with SQL Server Database.
- Evidence of unit testing (JUnit).
- Use of continuous integration tools and pipeline construction (Jenkins).

Developer | NAVA - Client: Santander (February 2023 – December 2023)

- Development and improvements focused on the MainframeXCloud internal integration environment.
- Utilized Camel technology for integration routing.
- Used the Openshift container management platform.
- Implemented the Kafka messaging system.
- Utilized GitLab for code repository management.
- Employed programming and persistence frameworks such as Spring Boot, Hibernate, and JPA.
- Incorporated the Lombok programming library and annotations.
- Utilized CloudWatch for scalable data search and visualization.
- Employed Jenkins for continuous integration and pipeline construction. Skills: Systems Programming · Jenkins · Software Development · JSP (JavaServer Pages) · Agile Environment · JSF · Java · Apache Maven · Amazon Web Services (AWS) · Git

Developer | Reply - Client: Ame Digital / Acessstage (January 2022 – June 2023)

- Development and improvements focused on the anti-fraud environment (Risc - Hub).
- Use of code repositories (GitHub).
- Use of a tool for detecting and correcting vulnerabilities in application dependencies (Snyk).
- Use of reactive programming (Spring Webflux).
- Use of an observability service for cloud-scale applications (DataDog).
- Use of data search and visualization resources (Kibana and CloudWatch).
- Utilization of code-reviewers (Sonar).
- Evidence of unit testing (JUnit).
- Use of an open-source build automation system (Gradle).
- Use of SQL Server, PL/SQL, and PostgreSQL databases. Skills: Programming (Computing) · JPA (Java Persistence API) · Software Development · Version Control · Communication · SOLID Principles · JSP (JavaServer Pages) · Mockito · Microservices · Spring Framework · Agile Environment · Analytical Skills · Hibernate · Spring Boot · Data Analysis · GitFlow · Database

Developer | Wipro - Client: Bradesco (March 2021 – December 2021)

- Experience with Agile methodologies (Scrum, Agile, Kanban, Refinement, Daily, Retrospective/Review).
- Development and improvements aimed at the structural and financial environment.
- Use of CWS and PDC.
- Development and adjustments in screens.
- Experience with development focused on the Microsoft AZURE environment.
- Use of code repositories (Bitbucket and Star Team).
- Utilization of code-reviewers (Sonar).
- Implementation of integrated tests (Cucumber).
- Experience with Java application servers: Tomcat, JBoss, and Websphere.
- Architectural experience in Web solutions.
- Development experience in Web projects.
- Experience with SQL Server Database, PL/SQL.
- Evidence of unit testing (JUnit).
- Experience in JAVA WEB, having worked with technologies such as JavaScript, JSON, JQuery, Spring Boot, JSF PrimeFaces, JSP, HTML, and XML. Skills: Programming (Computing) · JPA (Java Persistence API) · Software Development · Version Control · Communication · SOLID Principles · JSP (JavaServer Pages) · Mockito · Microservices · Spring Framework · Agile Environment · Analytical Skills · Hibernate · Spring Boot · Data Analysis · GitFlow · Database

Developer | K2 - Client: Sura Seguros (June 2018 – March 2021)

- Experience with Agile methodologies (Scrum, Agile, Kanban, Refinement, Daily, Retrospective/Review).
- Development and improvements aimed at the insurance environment (Property and Auto).
- Development focused on AWS and Microsoft AZURE environments.
- Use of code repositories (Bitbucket and SVN, Jenkins).
- Utilization of code-reviewers (Sonar).
- Experience with Java application servers: Tomcat, JBoss, and Websphere.
- Architectural experience in Web solutions.
- Development experience in web projects.
- Experience with SQL Server Database, PL/SQL.
- Evidence of unit testing (JUnit).
- Experience in JAVA WEB, having worked with technologies such as JavaScript, JSON, JQuery, Spring Boot, JSF PrimeFaces, JSP, HTML, and XML. Skills: Programming (Computing) · JPA (Java Persistence API) · Software Development · Version Control · Communication · SOLID Principles · JSP (JavaServer Pages) · Mockito · Microservices · Spring Framework · Agile Environment · Analytical Skills · Hibernate · Spring Boot · Data Analysis · GitFlow · Database

Developer | GFT Group - Client: Bradesco (January 2018 – July 2018)

- Experience with agile methodologies (Scrum, Agile, Kanban).
- Experience with Java application servers: Tomcat, JBoss, Weblogic, Websphere, and VRaptor.
- Architectural experience in Web solutions.
- Development experience in Web projects.
- Development focused on the AWB environment.
- Use of CWS and PDC.
- Development and adjustments on screens.
- Development and adjustment of Beans.
- Evidence of unit and integrated testing.
- Experience in JAVA WEB, having worked with technologies such as JavaScript, JSON, JQuery, JSF PrimeFaces, JSP, HTML, and XML. Skills: Programming (Computing) · Version Control · Communication · SOLID Principles · JSP (JavaServer Pages) · Mockito · Microservices · Agile Environment · Analytical Skills · Hibernate · Data Analysis · GitFlow

Technical Skills and Competencies

Languages: Java (6, 7, 8, 11 e 17)

Frameworks: Spring Boot, Spring Webflux, Hibernate, JPA, JSF, JSP

DevOps & Cloud: Jenkins, OpenShift, Kafka, Camel, Docker, Kubernetes (basic), AWS, Azure

Versioning: Git (GitLab, Bitbucket, GitHub), SVN, Star Team

Databases: SQL Server, PL/SQL, PostgreSQL

Methodologies: Agile (Scrum, Kanban), TDD

Quality & Testing: JUnit, Mockito, Cucumber, Sonar, Snyk

Architecture: Microservices, REST APIs, SOLID

Tools: Gradle, Maven, Lombok

Servers: Tomcat, JBoss, Weblogic, Websphere

Soft Skills: Technical Leadership, Team Coordination, Communication, Problem Solving

Languages

English: Fluente

Spanish: Basic

French: Basic
